

SCAFFOLDING REQUIREMENTS

- All scaffolding requires a Building Permit.
- Scaffolding drawings shall be prepared by a NYS Licensed Design Professional indicating type, size, anchoring and/or tie backs and safety line locations and load calculations.
- Roof plan indicating locations of proposed scaffolding.
- Site plan indicating locations of scaffolding and locations of building entrances/exits/pedestrian access areas (bridging to be filed under a separate permit application and drawings prepared by NYS Licensed Design drawings prepared by NYS Licensed Design Professional) (refer to bridging requirements).
- Two (2) Building Permit applications, Contractor's name and insurance (w/c, liability, hold harmless agreement).
- Scaffolding shall comply with NYS Labor Department standards Chapter 23-5 and NYS Building Code (2010) Chapter 33 Safeguards During Construction.
