CITY OF YONKERS, NEW YORK
ENGINEERING DEPARTMENT

STORMWATER MANAGEMENT REQUIREMENTS - DEPARTMENT OF HOUSING & BUILDINGS PERMITS
(This form to be filled out only by the Licensed Design Professional)

Project Address: ...........................................  Block: ...........................................
Lot: ..............................................................

Work Description: ...........................................  Housing & Buildings Application Number:

Select one (A - E) of the following and provide information as required. Note that related back-up maps and calculations must always be provided that illustrate existing and proposed ground cover data:

A. ☐ This project results in the creation of impervious surface areas that total less than 500 square feet in size. No Engineering Department review of storm water calculations is required.

B. ☐ This project results in the creation of impervious surface areas between 500 square feet and 999 square feet in size. Drywell storage volume for the project improvements shall be provided as indicated below:

- 500 - 549 sq. ft.: 110 cu. feet
- 550 - 599 sq. ft.: 120 cu. feet
- 600 - 649 sq. ft.: 130 cu. feet
- 650 - 699 sq. ft.: 140 cu. feet
- 700 - 749 sq. ft.: 150 cu. feet
- 750 - 799 sq. ft.: 160 cu. feet
- 800 - 849 sq. ft.: 170 cu. feet
- 850 - 899 sq. ft.: 180 cu. feet
- 900 - 949 sq. ft.: 190 cu. feet
- 950 - 999 sq. ft.: 200 cu. feet

Minimum drywell storage to be provided.

C. ☐ This project results in the creation of impervious surface areas between 500 square feet and 999 square feet in size. An alternative project stormwater management analysis has been performed by the project Licensed Design Professional and is attached (25-year, 6.47 inch rainfall basis).

D. ☐ This project results in the creation of impervious surface areas that total in excess of 1000 square feet in size. A project stormwater management analysis has been performed by the project Licensed Design Professional and is attached (25-year, 6.47 inch basis).

E. ☐ This project disturbs an area equal to or greater than 1 acre in size. The project will be required to obtain a Stormwater Management Permit from the Engineering Dept., in conformance to the requirements of City of Yonkers Code §56-174 - Stormwater Management and Erosion and Sediment Control.
